

TECH ADVICE

In order to maximize your ministry experience we have put together a suggested list of audio and video resources that will amplify your upfront presentation at a reasonable cost.

Flatscreen Smart TV Options

LG Electronics Model LF6090 50" Smart TV

Suggestion: Sam's Club \$598

Samsung LED H5203 Series 50" Smart TV

Suggestion: Sam's Club \$498

In our church, we prefer and use LG Electronics flatscreen. If you wish to play directly from the USB, your choice of flatscreen must be able to play videos from the USB. This gives you the freedom to play the Press Play video file directly from the USB without using any other device. However, you may transfer to a laptop, Ipad Tablet or any other computable device.

Sound Bar Options

LG Electronics NB3530A Sound Bar System

Suggestion: Amazon \$179

LG NB2020A Speaker Bar

Suggestion: Amazon \$99

These sound bars plug directly into the flatscreen of your choice and will provide ample sound to fill almost any size room. Although all flatscreens have their own built in sound system, a sound bar gives great clarity for the teaching time and adds fullness to worship and game time.

What will you see on the USB?

From your computer:

After inserting your Harvest Kids Now USB into your computer, the computer will automatically detect the USB and present it on your desk top. Each USB is named by the series you purchased. By clicking on the USB you will see all the video files, listed by week, for both preschool and grade school. You will also see a folder for "Everything Else" This folder includes all your printable resources: ME Tools, Take-home devotionals, Playbook, series overview by preschool and grade school division, duplication release and more. (We do not supply coloring sheets.)

From your Smart TV:

After inserting your Harvest Kids Now USB in the back of the flatscreen, a USB tab will pop up after pressing the input button on your remote control. Selecting the USB input tab brings up the below screen. Under the video tab you will see the video files for both Grade School marked GS, and Preschool marked PreK. The file will play directly from the USB once you have selected the story file.

What can you do with the files?

Transfer either Preschool Press Play files or Grade School Press Play files to a separate USB. Transfer Everything Else You Need folder to your desktop.
